

Dairy Development

Builds dairy value chains from farm to business and with that takes responsibility to feed the world in a sustainable way

WHY

Our 3 strategic pillars

Food security

Increase contribute to the self-sufficiency of a country with locally sourced milk.

Farmer livelihood

Improve net income of a farmer based on dairy activities.

Environmental sustainability

Reduce carbon footprint per kg of milk.

HOW

Dairy Development grows dairy value chains from farm to business

Set up partnerships to optimize the enabling environment of farmers.

Offer support and knowledge to build farmers' capacity.

Establish infrastructure to improve access to the local market.

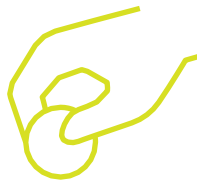

Nourish consumers with local and fresh products.
