PRO WEIDELAND – Dairy audit on 17, 18 and 19-03-2026
Confirmation

Dear Mrs. Kikkert - Gansekoele

on 17, 18 and 19 March 2026 auditor Ms. Bergsma checked the implementation of the general conditions and criteria for the commercialization of pasture milk products according to the standard of "PRO WEIDELAND - Deutsche Weidecharta GmbH" within the scope of an inspection at your company. The result of this inspection was documented in a checklist version 1.1, of which you received a copy.

The check as well as the cross-check in the office shows that the requirements for the PRO WEIDELAND label are fulfilled.

A total of 331 farms have confirmed their participation in the PRO WEIDELAND pasture milk program. The first surveys of the farms were carried out by your dairy and the results are available to us.

Based on the dairy audit on 17, 18 and 19 March 2026, the control institute Qlip b.v. confirms to the FrieslandCampina B.V. the successful separation of the flow of goods of the pasture raw milk and the pasture milk at all stages of transport, preparation, processing as well as packaging according to the PRO WEIDELAND criteria.

This confirmation is valid until the next audit in 2027 but at the latest until 31-12-2027.

Kind regards,

H.J. Bobbink, chief executive officer
